25. Description of Major Duties and Responsibilities (See Attached)					

### INTRODUCTION

The incumbent of this position serves as a Division Chief in the Directorate for Research and Engineering Management (E) of Simulation, Training and Instrumentation Command (STRICOM), a major subordinate command of the U.S. Army Materiel Command AMC). The mission of STRICOM is to provide centralized management and direction for all research, development, acquisition and fielding of Army training devices, simulations and simulators; instrumentation, targets and threat simulation; and Distributed Interactive Simulation (DIS). The commander centrally directs, coordinates and supports the materiel development, acquisition and sustainment activities through the matrix organization and four Project Managers. Responsibilities encompass planning, programming, directing and controlling engineering support to the STRICOM Project Managers and Directors during the concept formulation, development, test production, fielding and post deployment phases of a system's life cycle. Daily activities are carried out by an extensive subordinate organization consisting of civilian and military engineers and scientists, technicians, specialists and various other support personnel.

### MAJOR DUTIES

1. Establishes plans, programs, policies and schedules to assure that assigned programs and projects are accomplished in accordance with customer needs and goals. Considering joint (multi-service) implications, plans and formulates approaches to system support responsive to Army needs. Coordinates the work of various STRICOM Directorate organizational elements to ensure sound and consistent project execution. Serves as member of internal resource board for assignment of engineers to programs and projects. Provides matrix support in the form of engineering services to project/product managers. Reviews results of internal and external coordinated efforts of operating activities in light of policies, objectives, work methods and results and recommends organizational or policy changes to more effectively accomplish mission.

20%

2. Manages the respective division's products, the entire engineering life cycle effort at STRICOM and the associated resources from support service contractors, other activities, commands and agencies. Directs and oversees engineering development and testing performed by contractor employees which augment the STRICOM work force. Responsibilities also include engineering process technology programs. Monitors the progress of assigned program and project goals/objectives. Assures in-house and contractual efforts are executed in accordance with established policies, schedules and funding levels. Resolves

technical problems in scientific and engineering fields and makes final decisions on controversial issues and problems crossing organizational lines. Evaluates the technical quality of accomplishments, applies scientific and engineering knowledge to analyze technical reports, test results, operational reports and directs corrective action as appropriate. Effects internal and external coordination to ensure efficient STRICOM engineering support programs. Participates in meetings, briefings and conferences with high-ranking military and civilian officials within AMC, Department of the Army (DA) and Department of Defense (DOD) as well as private industry.

25%

3. Develops, monitors and continually improves on engineering processes and procedures in support of STRICOM systems. In conjunction with the director establishes and/or alters operating policies, procedures and priorities to provide for compliance with higher authority and to assure effective and successful accomplishment of programs and projects. Proposes new policies with respect to integration and coordination of the STRICOM effort. Adapts existing policies to incorporate state-of-the-art advances in technology related to simulation and instrumentation systems to assure effective and successful accomplishment of mission. Stays abreast of new and emerging technology related to simulation and instrumentation systems to ensure effective and successful accomplishment of the mission.

20%

4. Participates in managing the personnel assignments to support engineering efforts. Executes sound managerial principles and practices to assure effective accomplishment of mission and workload distribution. Devises effective and economical organizational structures, manpower allocations and functional breakdown to assure the optimum balance between skills utilization and economy efficiency. Reviews and manages the position structure and takes an active role in the position management review process. Encourages and supports the recruitment, selection, development and retention of a high quality work force and promotes equal employment opportunity. Establishes performance standards/objectives in accordance with the Total Army Performance Evaluation System (TAPES) and appraises performance and recommends awards for assigned subordinates as required. Advises subordinates on career development, training needs and opportunities.

35%

Performance other duties as assigned.

**SUPERVISORY FACTORS**

**FACTOR 1 - PROGRAM SCOPE AND EFFECT**

1. **SCOPE AND EFFECT LEVEL 1-4 775 PTS** - Directs a segment of a professional, highly technical and complex program which involves major aspects of Army's simulation efforts and technology advances. The program segment directed affects STRICOM's ability to perform its mission as a major subordinate command, which in turn affects the readiness of the U.S. Army. Projects managed receive frequent congressional and media attention and are essential to the success of major defense programs.

2. **ORGANIZATIONAL SETTING LEVEL 2-2 250 PTS** - The position is accountable to a position that is one reporting level below the first SES, flag or general officer.

3. **SUPERVISORY AND MANAGERIAL AUTHORITY EXERCISED 3-2 450 PTS** - Plans and schedules ongoing work on a quarterly or annual basis and adjusts staffing levels within their organizational unit to accommodate resource allocation decisions made at higher echelons; assigns work (based on capabilities of the employees), schedules and deadlines; evaluates work performance of subordinates, advises and counsels subordinates, makes selections for vacancies and promotions, hears and resolves complaints of employees, effects disciplinary measures, identifies training needs, develops objectives and standards, improves productivity.

**4. PERSONAL CONTACTS**

**Subfactor Level 4A-4 100 PTS** - Frequent contacts are with influential individuals such as private industry academia, executive level contracting officials of major defense contractors, SES, flag or general officers.

**Subfactor Level 4B-3 100 PTS** - Incumbent represents STRICOM at conferences, briefings and meetings. The purpose of contacts is to justify, defend or represent the program segment in obtaining or committing resources, gaining compliance with established policies, regulations, or contracts.

5. **DIFFICULTY OF TYPICAL WORK DIRECTED LEVEL 5-8 1030 PTS** - The highest level of base work directed is GS-14, but majority of workload (constituting 25% or more) is performed at the GS-13 level.

6. **OTHER CONDITIONS LEVEL 6-6 1325 PTS** - Supervision at this level requires extensive coordination and integration of complex programs of professional, scientific, and technical work.

**CRITICAL ACQUISITION POSITION AMENDMENT TO PD#** 12027

"This is a Critical Acquisition Position. Unless specifically waived by the appropriate Army official, the following are statutory requirements (Reference: 10 U.S.C. 1733 - 1737):

- Selectee must be qualified for Acquisition Corps membership at the time of selection or possess a waiver.
- Selectee must execute, as a condition of appointment, a written agreement to remain in federal service in this position for at least 3 years. In signing such an agreement, the employee does not forfeit any employment rights, nor does such an agreement alter any other terms or conditions of employment."
